

Medprime Technologies secures pre-series A funding to propel growth and AI innovations in health tech

21 October 2024 | News

Ashish Kacholia, Co-founder of Hungama Digital, invests in Medprime Technologies' pre-series A round

Medprime Technologies, a leading medical device company at the forefront of developing cutting-edge healthcare solutions in diagnostics, has announced the successful closing of its Pre-series A funding, with investment from renowned investor Ashish Kacholia, Co-founder of Hungama Digital and one of India's top 10 investors.

The funds will drive Medprime's growth, with a particular focus on establishing an international market for CILIKA. Additionally, the investment will accelerate the launch of advanced AI modules to enhance its MICALYS platform in India. The funding will also enable significant improvements in Medprime's manufacturing capabilities, boosting both efficiency and production capacity to meet rising global demand.

Medprime has established a strong presence in digital microscopy, with its devices already being utilized by leading medical colleges and research institutions across India. Renowned institutions such as the All-India Institute of Medical Sciences (AIIMS), Maulana Azad Medical College, Grant Medical College, Banaras Hindu University, IIT Delhi, IIT Madras, Dr. Lal Path Labs, Apollo Diagnostics, and Dr. Rajendra Prasad Central Agricultural University have adopted Medprime's cutting-edge digital microscopes, underscoring the company's commitment to excellence.

Medprime's MICALYS is a pioneer in AI-driven healthcare solutions, and the soon-to-be launched AI modules will further accelerate the company's mission to enhance medical diagnostics through advanced technology. "The future of healthcare lies in the convergence of technology and medicine. With Medprime's approach and their commitment to improving lives, I believe this partnership will lead to significant advancements in medical diagnostics," said Ashish Kacholia.

Beyond AI innovations, Medprime is focused on upgrading its manufacturing processes to increase efficiency and scale production. This strategic shift will allow the company to expand its operations and meet the growing needs of healthcare providers worldwide.

Founded in 2014 by four biomedical engineering postgraduates from IIT Bombay, Medprime has grown with the support of prominent Indian and global entities. The company is backed by USAID-supported SAMRIDH, managed by IPE Global, and has received BIG and SBIRI grants from BIRAC. Medprime also benefits from a robust support network, including government agencies such as MeitY and industry associations like NASSCOM. Its growth has been further bolstered by

partnerships with academic institutions like IIT Bombay, incubators such as SINE and Venture Centre, and organizations like Social Alpha. Venture capital firms such as Lavni Ventures, Riso Capital, Mumbai Angels, and Keiretsu Forum have also recognized and invested in Medprime's potential.
