Global Cloud Cayr launches health management services in Kolkata

08 January 2025 | News

Leveraging a leadership team of US based medical experts

Global Cloud Cayr (GCC), an innovative healthcare startup founded by an international team of doctors and technologists, has officially launched its operations in Kolkata.

This milestone marks the start of GCC's mission to revolutionise healthcare delivery through a proactive, holistic, and technology-integrated approach. Designed to cater to individuals, families, and the elderly, including those managing chronic conditions, GCC brings personalized healthcare services directly to their homes or preferred locations.

Combining virtual consultations with in-person services, GCC focuses on prevention, wellness, and participant-centric care to ensure accessible, effective, and empathetic healthcare. Its unique model is designed to address the growing need for personalized, comprehensive health-management solutions, particularly in the face of rising chronic diseases and lifestyle-related health challenges.

GCC offers a wide range of services tailored to meet diverse healthcare needs. These include preventive health and wellness management through monitoring and early intervention, chronic disease management with personalised care plans for long-term conditions such as diabetes and heart disease, acute healthcare packages for addressing short-term illnesses or injuries, and emergency support for critical health situations.
