Eli Lilly to establish new global capability centre in Hyderabad

09 January 2025 | News

Plans to hire approximately more than 1,000 new highly-skilled team members

US-based pharmaceutical firm Eli Lilly and Company has announced plans to establish a new global capability centre in Hyderabad. Lilly will be recruiting more than 1,000 highly skilled team members to strengthen the company's digital strategy and service delivery. Recruitment for the new site is underway, and the centre is expected to be operational by mid-2025.

The Hyderabad centre will be known as Lilly Capability Centre India (LCCI) and will initially focus on expanding Lilly's capabilities in automation, artificial intelligence, software product engineering and cloud computing to deliver advanced technology solutions that meet the evolving needs of Lilly's business worldwide.

LCCI Hyderabad will be Lilly's second capability centre in India, following LCCI Bengaluru, which was launched in 2016.

"Our teams in India play a pivotal role in driving Lilly's global business support with centralized, scalable solutions. LCCI Hyderabad will enhance our technical capabilities, enabling us to better meet growing business demands, fully leverage technology in our operations, and further expand our presence in India," said Manish Arora, Managing Director, LCCI Hyderabad.
