Indira IVF expands into maternity & child healthcare with launch of MatCare in Varanasi

11 March 2025 | News

Launches its first MatCare Maternity & Child Hospital in Varanasi

Indira IVF has announced its foray into maternity and child healthcare with the launch of MatCare Maternity & Child Hospital in Varanasi. This marks an expansion within the core offering of reproductive care, highlighting Indira IVF's commitment to providing high-quality, integrated services that comprehensively address the needs of families.

The hospital is designed to provide expertise, advanced infrastructure, critical neonatal care (Level III NICU), and personalized care under one roof for expectant mothers, new-borns, and high-risk pregnancies.

With the launch of its first hospital in Varanasi, Matcare Wellness Private Limited - a wholly owned subsidiary of Indira IVF Hospital Limited expands functioning in mother & child healthcare.

Equipped with advanced delivery rooms, modern operating theatres, and a Level III Neonatal Intensive Care Unit (NICU), MatCare is designed to provide seamless, end-to-end care from pregnancy to childbirth and beyond. Additionally, the facility will offer high-risk pregnancy management, minimally invasive gynaecological surgeries, neonatal surgical interventions, foetal medicine services, and postnatal rehabilitation, ensuring that mothers and new-borns receive comprehensive, expert-led medical attention.

The hospital has been designed to provide high-quality treatment and critical care, offering 24/7 laboratory services, an in-house pharmacy, physiotherapy, lactation counselling, and a neonatal retrieval transport system, reinforcing its commitment to seamless, patient-centric care.

MatCare Maternity & Child Hospital aims to bridge critical gaps in maternity and neonatal healthcare, making high-quality, specialized care more accessible to families across India. By prioritizing Tier 2 and Tier 3 cities, where access to advanced maternal and neonatal services remains largely unmet, MatCare brings medical expertise and infrastructure to these regions, providing more families with the care they deserve.
