24 March 2025 | Reports/white papers

**Term insurance is generally described as the most basic form of life cover.**

It covers a fixed premium over a certain term for an assured sum that is paid to the beneficiary in case of their demise during the insurance term. People tend to weigh in on options to find the [best term plan](#) that fits their budget while maintaining decent coverage. Others advocate the most rewarding plan, which offers a return on premium, i.e., the insured gets all premiums paid back if he survives the term.

In this post, we will examine the three most popular term insurance plans in India, which offer the highest coverage for the lowest premium, and discuss what distinguishes them from other options.

### Understanding the Benefits of a Term Plan

People often look for the [best term plan](#) to protect their family. But what makes a term policy so special compared to other saving options? One of the most important factors is that it has no investment component. This means you are not paying extra for wealth-building. It's purely about giving your family a safety net if you aren't there. That often translates into lower premiums for higher coverage compared to other investment products. Terms can range from five years to as long as 50 years. Premiums usually remain the same throughout, which is great for long-term planning.

Many term plans also come with a possibility for riders, like an accidental death benefit or waiver of premium if you're diagnosed with certain illnesses. Some allow a return of premium option, often called TROP (Term Return of Premium), which means that if you survive the policy term, you get back all or most of the premiums paid, excluding taxes and rider charges. This is especially appealing to those who want the [best term plan with return of premium](#) since it combines protection with some money-back component.

- **Do You Want Riders?** Consider critical illness cover, accidental death benefits, and premium waiver options.
- **How Long Do You Need Coverage?** Plans with maturity ages of 80+ years work well if you want to leave a financial legacy.
