

DigiNerve introduces comprehensive learning solution for Prof 2 MBBS students

28 March 2025 | News

Comprehensive coverage of Microbiology, Pathology, and Pharmacology with 370+ hours of video lectures

Delhi-based DigiNerve, an EdTech platform by Jaypee Brothers Medical Publishers, has launched DigiTwo, an innovative learning combo designed specifically for Prof 2 MBBS students. This comprehensive solution combines cutting-edge digital learning with expert-led instruction to strengthen students' foundation in essential Prof 2 subjects.

DigiTwo's expert faculty panel includes distinguished educators from Microbiology, Pathology, and Pharmacology. DigiTwo addresses the complexities of medical learning through an integrated approach, featuring over 320+ topics supported by detailed video lectures and printed notes.

The package also includes a robust Question Bank with 2,000+ practice questions alongside 30+ Objective Structured Clinical Examination (OSCE) modules for practical skill development. Students benefit from 450+ High-Yield GEMS for quick revision and regular webinars conducted by leading medical educators.

Setting new standards in medical learning technology, DigiTwo introduces the Dr. Wise AI Chatbot for instant query resolution and personalised learning support. The platform's structured test series enables students to track their progress while building confidence through regular assessment and detailed performance analysis.

This launch marks a significant milestone in DigiNerve's commitment to transforming medical learning, offering students a dynamic and effective pathway to master the subjects. The platform combines traditional learning methodologies with innovative digital solutions, ensuring students are well-equipped for examinations.
