Collaborative AI Research Labs Foundation joins hands with Atal Incubation Centre, CCMB

15 April 2025 | News

Focusing on the intersection of Artificial Intelligence and Life Sciences

Collaborative AI Research Labs Foundation (CAiRL) has announced the signing of a Memorandum of Understanding (MoU) with Atal Incubation Centre - CCMB (Cellular and Molecular Biology), a Hyderabad-based incubation centre focused on deep tech and biotech innovation.

The MoU was signed by Sarvesh Singh (Director General, CAiRL) and Dr N. Madhusudhan Rao (CEO, AIC-CCMB). This collaboration is a significant step toward building a thriving innovation ecosystem at the intersection of Artificial Intelligence and Life Sciences.

Through this partnership, CAiRL and AIC-CCMB will co-develop programmes that enable AI-driven research, support startup incubation, and nurture cross-disciplinary innovation.

The shared vision is to accelerate scientific discovery and translational research by enabling bio-entrepreneurs and researchers to access cutting-edge AI tools, mentorship, and global exposure.

The key focus areas include AI for genomics, drug discovery, and diagnostics; Startup acceleration in biotech and healthtech domains; Joint workshops, fellowships, and research grants; Collaborative projects that integrate data science and molecular biology.
