Aster DM Healthcare to invest Rs 480 Cr in new facility in Bengaluru

07 May 2025 | News

430 bedded multispecialty hospital will come up in Sarjapur, Bengaluru

Aster DM Healthcare, one of the largest integrated healthcare providers in India, has announced the signing of a lease agreement to establish its 4th Multispecialty Hospital in Bengaluru.

This 430-bed state-of-the-art facility to come up in Sarjapur is set to revolutionise healthcare in the region with its comprehensive and specialised medical services.

Aster DM Healthcare will be making an investment of around Rs 480 crore in this facility spreading over 4 lakh sq ft. The first phase of the project with 300 beds will be operational by the second half of FY27 and the remaining 130 beds in FY29.

With the establishment of its fourth hospital in Bengaluru, Aster will strategically achieve a city-wide presence, covering all major zones and solidify its position among the top three hospital chains in the city.

Sarjapur Road is rapidly emerging as Bengaluru's next major IT hub, driven by robust infrastructure development and strategic location advantages. The Karnataka Industrial Areas Development Board (KIADB) has announced plans to develop a state-of-the-art IT hub spread across 1,050 acres.

This development is complemented by a surge in approved residential and commercial projects, positioning Sarjapur as a high-growth corridor.

Dr Azad Moopen, Founder & Chairman, Aster DM Healthcare said, "This state-of-the-art facility is being designed to deliver world-class, patient-centric care and will cater to the rapidly growing healthcare needs of the region. As part of our broader vision to strengthen our footprint in key urban centers, the upcoming hospital reinforces our commitment to enhancing access to advanced medical services. Notably, this will be a comprehensive multi-specialty hospital in the South-East Bengaluru micro market, with a focus on cancer care, establishing a strong oncology footprint from inception."
