RedVersity and AIHSM roll out healthcare programmes for aspiring professionals in Hyderabad

09 May 2025 | News

Programmes designed to shape the next generation of healthcare professionals

In a strategic move to equip students with job-relevant skills and close the critical talent gap, RedVersity, the academic and skilling arm of RED Health, has partnered with the Asian Institute of Health Sciences and Management to launch nine specialised programmes in Hyderabad.

These programmes are designed to shape the next generation of healthcare professionals through a blend of academic rigor and real-world application. With a combined annual intake of more than 500 students, the offerings include B.Voc., M.Voc., Diploma, Advanced Diploma, Postgraduate in Management, Executive Postgraduate Program in Management, PG Diploma, and Physician Assistant programmes. Admissions have officially opened, and classes are scheduled to begin in mid-August at the Hyderabad campus.

At the core of these programmes lies a curriculum aligned with real-time industry needs. Students can specialise in key disciplines such as Emergency Medicine, Cardiac Care Technology, Cardiovascular Technology, Respiratory Therapy, and several others that are essential to modern healthcare delivery. These high-demand focus areas reflect the commitment of both institutions to address the most pressing clinical skill gaps in India and abroad.

The curriculum emphasises practical, hands-on learning with simulation-based training. This approach ensures that students develop the critical thinking and clinical skills required to perform effectively in high-stakes healthcare environments. Every enrolled student will benefit from guaranteed internships and assured placements, reflecting the deep industry alignment embedded in the programme design.
