

SSI MantraM 'Made in India' Surgical Robot Yatra kicks off India tour

04 July 2025 | News

To cover key medical institutions across Jaipur, Jodhpur, and Ajmer from July 3 to 10

SS Innovations, the maker of India's first and only home-grown surgical robotic system, SSI Mantra, recently flagged off the SSI MantraM "Made in India" Surgical Robot Yatra from its headquarters in Gurugram.

The roadshow was ceremoniously inaugurated by Rao Narbir Singh, Minister for Industries & Commerce, Government of Haryana. With the launch of the SSI MantraM Surgical Robot Yatra, India embarks on a transformative journey in healthcare, unveiling its first mobile robotic surgery training and demonstration unit.

This innovative 'telesurgery-on-wheels' initiative brings cutting-edge surgical technology and skill-building opportunities directly to hospitals and healthcare professionals across the country.

Developed indigenously, the unit is equipped to enable real-time collaboration and demonstrate the advanced features and capabilities of the SSI Mantra Surgical Robotic System.

Through live simulations, interactive training modules, and guided demonstrations, it offers surgeons, medical students, and healthcare stakeholders a first-hand experience. This initiative marks a significant step toward increasing awareness and acceptance of robotic surgery in particularly by making cutting-edge surgical technologies more accessible to Tier 2 and Tier 3 cities.

As part of its first leg through Rajasthan, the SSI MantraM Yatra has commenced on July 3 & 4 at SMS Medical College, Jaipur, featuring live demonstrations and interactive training sessions for both the medical fraternity.

Later in the afternoon on July 4th, the MantraM will move to AIIMS Jodhpur, the yatra will participate in the RUFCO until July 6th. On the July 6th evening, proceed to Mathura Das Mathur Medical College for more sessions on July 7. The Rajasthan leg will conclude on July 8 with a final showcase at Jawaharlal Nehru Medical College, Ajmer, before returning to Gurugram.

Covering over 1,500 kilometres, the first leg of the Yatra will offer transformative training and learning opportunities to more than 500 doctors across Rajasthan, furthering SSI Innovations' mission to democratize access to advanced surgical technologies in India.

The total cost of SSI MantraM, including structural modifications, is approximately Rs 1.3 crore. However, this cost does not include the SSI Mantra Surgical Robotic System, whose price varies depending on features and robotic arm configurations.
