

RCC Nutrafill invests Rs 100 Cr into new food processing & life sciences manufacturing facility in Kerala

15 September 2025 | News

Facility spread across 5 acres, is set to complete Phase 1 within the next 24 months

RCC Nutrafill recently held the Bhoomi Pooja and foundation stone laying ceremony for its upcoming Food Processing and Life Sciences Manufacturing Facility at the KSIDC Business Park in Angamaly, Kerala.

P. Rajeev, Minister for Industries, Law and Coir in the Government of Kerala, presided over the Foundation Stone-Laying Ceremony in the presence of dignitaries, Government officials, company leadership, and local stakeholders.

The facility spread across 5 acres, is set to complete Phase 1 within the next 24 months. Designed to be the first of its kind, the facility will serve as an integrated manufacturing & processing hub, combining cold storage, warehousing, research and development, logistics, and the handling of Life Sciences and FMCG products.

Upon commercialisation the facility will cater to the processing of Food, Marine, Spices, Agricultural, and medical products through USDA-accredited-technology, ensuring product safety, shelf-life extension, and compliance with global standards.

RCC Nutrafill, located in Malur, Karnataka, is India's first integrated manufacturing facility for ready-to-use media and adjuvants. RCC Nutrafill specialises in the development and manufacture of adjuvants, raw materials and consumables essential for biopharma and pharmaceutical industries.
