Alkem Foundation invests Rs 100 Cr towards establishment of radiotherapy centre in Bihar

17 September 2025 | News

With a capacity to treat approximately 3,500-4,000 cancer patients annually

Alkem Foundation, a wholly owned subsidiary and CSR arm of Alkem Laboratories Ltd., has supported the establishment of Samprada Singh Memorial Radiotherapy Centre in Muzaffarpur, Bihar, with an investment of Rs 100 crore.

This radiotherapy centre, the largest one in North Bihar and the second-largest in the entire state, is part of Homi Bhabha Cancer Hospital and Research Centre that was recently inaugurated by Prime Minister Narendra Modi.

This state-of-the-art radiotherapy centre stands as a tribute to Alkem's Founder and Chairman Emeritus Late Samprada Singh. The centre has been set up in collaboration with the Tata Memorial Centre, Mumbai (TMC), bringing together Alkem's strong commitment to social investment in healthcare and TMC's understanding and expertise in cancer care and research.

Technologically the most-advanced radiotherapy facility in Bihar and among the top three to four in eastern India, the centre is equipped with linear accelerators (LINAC), stereotaxy, organ motion management systems, CT simulator, and in-house brachytherapy with dedicated applicators. The centre, which has a capacity to treat approximately 3,500-4,000 cancer patients annually, aims to provide world-class treatment to patients in Bihar and adjoining regions.

"With cancer cases rising each year, the need for world-class facilities closer to home has never been greater. This centre will not only play a vital role in strengthening access to technologically advanced cancer treatment options but also help in easing the patient journey and supporting families, creating a holistic model of care. Our collaboration with Tata Memorial Centre reflects the shared goal of providing sustainable healthcare solutions that have a lasting impact," said Madhurima Singh, Executive Director and Chairperson of Corporate Social Responsibility and Sustainability Committee, Alkem.
