Telangana govt launches coffee table book showcasing Indiaâ??s life sciences leadership and Hyderabadâ??s GCC rise

07 October 2025 | News

Coffee table book traces the evolution of Life Sciences and Healthcare GCCs (LSHC GCCs) in India

The Government of Telangana, in collaboration with global healthcare and lifescience consulting firm Healthark, unveiled a first-of-its-kind coffee table book titled “India’s Life Sciences Renaissance: The Hyderabad GCC Opportunity.”

This visually compelling book offers a sweeping chronicle of India's journey in life sciences and healthcare, with a focused lens on how Hyderabad is evolving as a global hub for innovation-driven Global Capability Centers (GCCs).

The book was officially launched by Anumula Revanth Reddy, Chief Minister, Government of Telangana and D. Sridhar Babu, Minister for IT, Electronics & Communications, Industries & Commerce, Government of Telangana.

The coffee table book traces the evolution of Life Sciences and Healthcare GCCs (LSHC GCCs) in India, beginning in the early 2000s with a focus on cost efficiency and back-office support, through their transformation into high-value strategic hubs that now anchor global R&D, digital innovation, and enterprise leadership.

Today, Hyderabad stands as a beacon of this transformation with over 2,000 life sciences companies, contributing to one-third of the world's vaccine production, and housing 250+ USFDA-approved sites, the highest concentration globally.

Conceptualised by the HealthArk in collaboration with the Government, the book features success stories, leadership insights, and sectoral contributions of over 10+ global organizations that have chosen Hyderabad as their strategic base. It captures how these centers have evolved from support arms to global innovation powerhouses, driving value across functions like AI, cybersecurity, digital health, fintech, ESG, and more.

The launch also marks the beginning of a broader knowledge-sharing initiative by the Government of Telangana to further elevate Hyderabad's positioning as the life sciences capital of India and a global hub for GCC excellence.
