Manufactures finest materials

Advanced Microdevices is the filtration and separation materials/devices manufacturer in India with an exceedingly vast range of products. It is a research-based company and the entire manufacturing technology has been developed in-house to produce variety of membranes having applications in sterilizing filtration in pharmaceutical and biopharmaceutical industries. It has sales revenue of Rs 56 crore in fiscal 2009-10 as against Rs 45 crore in fiscal 2008-09.

The products of Advanced Microdevices are exported to more than 50 countries worldwide, including countries like the US, Western Europe, China, and South Korea. The company has deep penetration in Indian biopharma industry and enjoys dominant position in many product segments. The company has set up its overseas office in California, US, and work is going on for setting up a new joint venture company in the US. The company grows at a rate of over 25 percent and expects to maintain the same in the coming years. A new 85,000 sq. ft. state-of-the-art GMP facility at a cost of Rs 20 crore is nearing completion.

Strengthens stronghold in India

Beckman Coulter India Private Limited (BCIPL) is a wholly-owned direct subsidiary of Beckman Coulter (BC), US. The Indian subsidiary of the company clocked an annual sales revenue of Rs 52 crore thus registering a growth of 12 percent in fiscal 2009-10.

Prior to establishing a direct subsidiary in India, for 16 years, the company was represented in India through a reputed distribution channel.

The company caters to the Indian diagnostic industry, biopharmaceuticals, discovery research and government funded research institutes, pharmaceuticals and allied industries. Around 60 percent of the subsidiary's business comes from diagnostics while 40 percent comes from life sciences. A major proportion of the company's clients come from the public sector.

BCIPL had achieved major breakthroughs in 2009 for high-end laboratory automation systems and capillary electrophoresis in the biopharma customer segment.

The year 2006 was a landmark year for the company, as it tripled its business in India apart from coming up with some major breakthroughs in centrifugation.
