KIMS Hospitals forays into Karnataka with two new state-of-the-art facilities

09 March 2026 | News

Plans to establish three more facilities in Bengaluru

KIMS Hospitals Bengaluru, division of the Krishna Institute of Medical Sciences (KIMS), Secunderabad, one among India's largest and trusted healthcare groups, has launched two of its super-speciality hospitals located in Mahadevapura and Electronic City. The hospital was inaugurated by film star N.T.R. This is a strategic expansion in providing world-class, patient-centric, tech-enabled healthcare to the people of Bengaluru and beyond.

Both the units are prominently situated in the city's fastest-growing locations to ensure quality healthcare is easily accessible to all. Mahadevapura Unit has over 450 beds, while the Electronic City facility has 350 beds. Both facilities are equipped with 30 state-of-the-art operation theatres and over 170 outpatient consultation rooms (OPDs) to deliver the best medical care.

The facilities are integrated with 25-plus super speciality centres and Centres of Excellence across Cardiology, Neurology, Oncology, Paediatrics, Orthopaedics, ENT, Obstetrics and Gynaecology, General Surgery, Internal Medicine, Critical Care, and Chronic Disease Management. The hospitals will provide a range of healthcare services, from primary care on a 24/7 basis to advanced diagnostics and treatment options, ensuring a seamless care pathway from prevention and early detection through surgery and finally to management.

Dr Nitish Shetty, Managing Director, KIMS Hospitals, Bengaluru, said, "We strive to provide timely personalised healthcare. The Mahadevapura and Electronic City facilities have been planned to meet the growing health needs of the people of Bengaluru. These facilities have state-of-the-art ICUs, high-end diagnostic facilities and experienced medical professionals to ensure seamless patient care. Apart from these two units, three more units are also slated for the launch in the next years' time. Our units house some of the most advanced medical technologies available today. These facilities will act as major health hubs in Bengaluru and the IT Corridor areas."
