Cloudnine Group of Hospitals introduces fellowship in reproductive medicine

11 June 2026 | News

To build expertise in fertility and reproductive healthcare

Cloudnine Group of Hospitals, India's premium birthing centre in India, is offering a one-year Fellowship in Reproductive Medicine for obstetricians and gynaecologists who want to build expertise in fertility and reproductive healthcare.

Open to doctors with an MBBS and MD/MS in Obstetrics & Gynaecology, the programme provides training in fertility assessment, assisted reproductive technologies (ART), reproductive endocrinology, fertility preservation, and advanced fertility treatments.

With a structured curriculum, guidance from experienced specialists, and hands-on clinical training, the fellowship helps doctors develop the skills needed to manage infertility and deliver comprehensive fertility care.

Speaking on the sidelines of the fellowship programme says Dr Naga Nischal, Head – Clinical Services, Cloudnine Group of Hospitals, said, *"As fertility care continues to evolve, there is an increasing need for clinicians with advanced skills and specialized knowledge in reproductive medicine. This fellowship is designed to develop future-ready specialists through evidence-based learning, expert mentorship, and practical clinical experience, ultimately contributing to better fertility outcomes and women's healthcare in India."*

The programme provides participants access to Cloudnine's extensive fertility network, offering real-world clinical exposure under the guidance of experienced specialists. Upon successful completion, candidates will receive an industry-recognised Cloudnine Certification, with potential career opportunities within the Cloudnine network.
