Park Medi World announces 100-bed expansion at Palam Vihar Hospital

30 June 2026 | News

Newly expanded facility will be branded Park Hospital Platinum

Umkal Health Care, a wholly-owned subsidiary of Park Medi World, has approved a significant expansion of its existing 225-bed Park Hospital in Palam Vihar, Gurugram, with the addition of 100 new beds - a move that underscores the Park Group's continued commitment to strengthening healthcare infrastructure and deepening its footprint.

The Palam Vihar facility is one of the flagship hospitals of the group; in FY'26, it had an occupancy of ~86%, delivered a revenue of ~Rs 245 crore.

The newly expanded facility will be branded Park Hospital Platinum and is slated to commence operations in November 2026. Conceived as a distinctive addition to the healthcare landscape, the facility aims to set a new benchmark by seamlessly integrating elite healthcare facility with advanced clinical care, offering patients an unparalleled experience that combines comfort with comprehensive medical excellence.

With this expansion, Park Group's consolidated bed capacity across Gurugram will rise to 750 beds, further reinforcing its ability to address the region's growing demand for quality, accessible, and advanced healthcare services.

The expansion at Palam Vihar will be strategically oriented towards bolstering super-specialty capabilities, with focused investments directed at key high-acuity disciplines. This will enable the hospital to deliver comprehensive tertiary care across a broader spectrum of complex medical conditions, further elevating the standard of specialized healthcare delivery in the region.
