Motorica becomes exclusive representative of Tehlin in India, expanding access to lower-limb prosthetic technologies

14 August 2026 | News

Collaboration expands Motorica's offering beyond upper-limb prosthetics

Motorica, a MedTech company focused on assistive technologies and medical cybernetics, has become an exclusive representative of Tehlin in India. Under the partnership, Motorica will be responsible for the promotion, availability, service and support of Tehlin's lower-limb prosthetic solutions in the Indian market.

Tehlin Prosthetics is a Taiwan-based manufacturer with more than 60 years of experience in developing and producing prosthetic and orthotic solutions, with a portfolio of lower-limb components.

The partnership brings together Motorica's expertise in upper-limb prosthetics and its growing network of clinical partners in India with Tehlin's experience in lower-limb prosthetic technologies, including knee joints, carbon feet and gel liners. For Tehlin, Motorica provides a partner with a strong understanding of the Indian market, established relationships with clinics and the local infrastructure needed to support the brand and its products.

For Motorica, the cooperation expands its portfolio beyond upper-limb prosthetics and enables the company to offer lower-limb solutions from Tehlin as part of a broader range of prosthetic technologies.

Both companies see the cooperation as a long-term strategic alliance aimed at strengthening their presence and capabilities in the Indian market.

The cooperation goes beyond product distribution: from August 12 to 14, the Tehlin team was working in India with Motorica's partners and specialists through product presentations, professional training and hands-on sessions, complemented by clinical activities in Delhi.
