Aster DM Quality Care injects Rs 500 Cr to open 300-Bed hospital in Hyderabad

14 November 2026 | News

Project forms part of Group's Rs 4,000 crore expansion programme targeting over 15,000 beds across India

Aster DM Quality Care, one of India's leading integrated healthcare providers, has announced that its upcoming 300-bed multispecialty Aster Hospital at Kondapur in Hyderabad, developed with an investment of Rs 500 crore and spread across 3 lakh sq. ft., will commence operations in March 2027.

The announcement coincides with the Hyderabad visit of Dr Azad Moopen, Executive Chairman, Aster DM Quality Care Limited, and marks another step in the Group's nationwide expansion strategy. With the addition of the new facility, the Group's total bed capacity in Hyderabad will exceed 1,700 beds.

Dr Azad Moopen, Executive Chairman, Aster DM Quality Care Limited, said, “Our planned investment of approximately Rs 4,000 crore over two years reflects our long-term commitment to strengthening healthcare infrastructure across India. We aim to add 4,000–4,400 beds, taking our network capacity beyond 15,000 beds through brownfield expansions, selective greenfield projects and strategic acquisitions. Telangana and Andhra Pradesh remain important markets for us, and we see significant opportunities to further expand our presence across the region."

The facility will feature 100 critical care beds, 10 modular operating theatres and luxury suites, along with advanced diagnostic and treatment technologies, including an advanced Cath Lab, CT, MRI, ECMO, IVUS, EBUS and ERCP. It will also provide 24/7 emergency care, strengthening access to critical and specialised medical services in the region.
