Select Biosciences to organize free workshop

Select Biosciences India has announced a free workshop on "Mass Spectrometry Solutions for Proteomics and Genomics Research". The workshop is being held in conjunction with "Genomics and Proteomics Research" Conference to be held in New Delhi on June 12-13, 2014. The conference is sponsored by AB SCIEX, a well known biosupplier company, dealing in chromatography products and co-sponsered by Premas Biosciences, the distributor of Illumina's products in India.

The workshop will be held at AB SCIEX's Centre of Excellence, Gurgaon, India on June 12, 2014 and is free for delegates of the genomics and proteomics research conference.

Apart from the worshop, the conference will focus on advancements in Genomics and Proteomics, especially in the field of gene analysis. This event will offer a definite advantage to the researchers in the fields of human, animal and plant genomics, genomics biomarkers, epigenetics, next-generation sequencing, miRNA and non-coding RNA, qPCR, bioinformatics, proteomics and proteome analysis including chromatography and mass spectroscopy. The program will consist of moderated sessions and engaging an expert panel on research themes at the core of Genomics and Proteomics. Registered delegates will have unrestricted access to all co-located meetings ensuring a comprehensive learning and sharing experience as well as being financially beneficial to attendees.

The oral presentations and posters presented in this conference will be published in a special issue of Computational and Structural Biotechnology Journal (ISSN 2001-0370) devoted to Genomics and Proteomics Research.
