Influential women in bioscience industry

12 March 2013 | Features | By BioSpectrum Bureau

Influential women in bioscience industry

It is a well known fact that men dominate the biotech industry. But over the past decade or so, many outstanding women have excelled in this niche sector. Throughout history many brilliant women have contributed globally for the growth of life sciences. While committed to her busy professional career, she had to balance the demands of her family, as well.

In an effort to laud their accomplishments, BioSpectrum presents some of the women who in their roles as CEOs, CSOs, directors, regulators, entrepreneurs, vice presidents, and scientific researchers, helped change the course of bioscience in the country.

Click here to read the short profiles of successful women in bioscience industryÂ
