Trivitron to distribute Sakura's histopathology products in India

Chennai-headquartered Trivitron healthcare has been assigned as the exclusive distributor for the entire range of Histopathology products from Sakura Japan in India.

Histopathology is the microscopic examination procedure of biological tissues to observe the appearance of diseased cells and tissues in very fine detail. The main use of histopathology is in clinical medicine where it typically involves the examination of a biopsy by a pathologist and interpretation of diseased tissues in microscopic detail.

SMART Automation is the logical next step to enhance laboratory workflow optimizing your laboratory's productivity, while reporting better turnaround times using the same resources. Millions of patients around the world have benefited from better and faster diagnoses offered by Histopathology laboratories that have implemented SMART Automation. SMART Automation results in consistent high-quality operations for all the tissue samples minimizing eliminating errors and reduction in rework.

Commenting on the alliance, GSK Velu, chairman and managing director of Trivitron Group of companies said, "Trivitron has been in the forefront of bringing the latest medical devices and medical equipment in a most cost effective fashion to India for past 19 years. We are proud to bring to India, the latest in histopathology automation - SMART automation system in association with Sakura Japan. This technology can revolutionize the way a histopathology laboratory functions by reducing the turnaround time and enabling same day reporting."
