

the DBT, BIRAC and Bill & Melinda Gates Foundation.

"GCE-India is looking to empower potentially life-changing ideas and enable scale-up. Our network of highly qualified individuals will work with innovators to help refine strategy and provide technical consulting. Through this programme, we aim to identify nurture and empower revolutionary ideas that address global health challenges" said Dr Deepanwita Chattopadhyay, Chairman & CEO at IKP Knowledge Park.

Apart from the funding, BIRAC and IKP Knowledge Park will closely work with the chosen candidates; provide them technical and business strategy advice, as also access to synergistic networks within the nation and outside; factors that would be critical to making an innovation a medical and commercial success.

"GCE-India is the platform which will enable idea generation and help translate research into action. If India is to stand shoulder to shoulder with the larger economies, it is important that it becomes self-sufficient. Therefore, we expect that healthcare innovation from within the nation will be able to address the needs of the country better; GCE-India is a search to identify healthcare innovations in India that will enable standardized healthcare for all irrespective of where they seek it," said Dr Steven Buchsbaum, Deputy Director, Discovery & Translational Sciences, Bill & Melinda Gates Foundation.
