Smart healthcare initiative launched by Samsung

09 May 2017 | News

Samsung Smart Healthcare program aims to support the government's efforts to benefit communities with limited access to quality healthcare.

Samsung India introduced its Smart Healthcare program that provides affordable and quality healthcare to patients from the economically and socially weaker sections of society at Osmania General Hospital in Hyderabad.

As part of its Smart Healthcare program, Samsung will be providing advanced and innovative healthcare equipment such as ultrasound and digital radiology (x-ray) manufactured by the company free to specified government hospitals across the country.

The Samsung Smart Healthcare facility was inaugurated by C. Laxma Reddy, Minister for Health, Government of Telangana and Deepak Bhardwaj, Vice President, Samsung India, in the presence of other dignitaries.

Samsung Smart Healthcare program aims to support the government's efforts to benefit communities with limited access to quality healthcare.

With innovative products such as ultrasound, digital radiology and accessories that facilitate healthcare intervention and multiple medical examinations, since 2015, Samsung has collaborated with 16 government hospitals across to country for the Samsung Smart Healthcare program. Doctors, technicians and radiologist are also trained to handle state-of- the-art diagnostic equipment and software.
